

# Maximize uptime and improve resiliency with Astreya's Managed Network Services.

## Ensure a securely connected and productive organization

For today's rapidly evolving hybrid networks, Astreya's Managed Network Services is as innovative as the technology itself. We offer a comprehensive range of managed services to support the most complex and demanding hybrid-IT network infrastructures.

Managing and operating a hybrid network or data center involves many integrated activities, including maintaining equipment and systems, training, and capacity management for power and cooling. These diverse activities have one thing in common; they need experienced, right-skilled personnel. And that's precisely where Astreya comes in.

Astreya provides solutions to support complex hybrid network infrastructures. We focus on data centers and cloud and cloud-centered strategies to design and seamlessly align your infrastructure to the next generation of cloud computing.

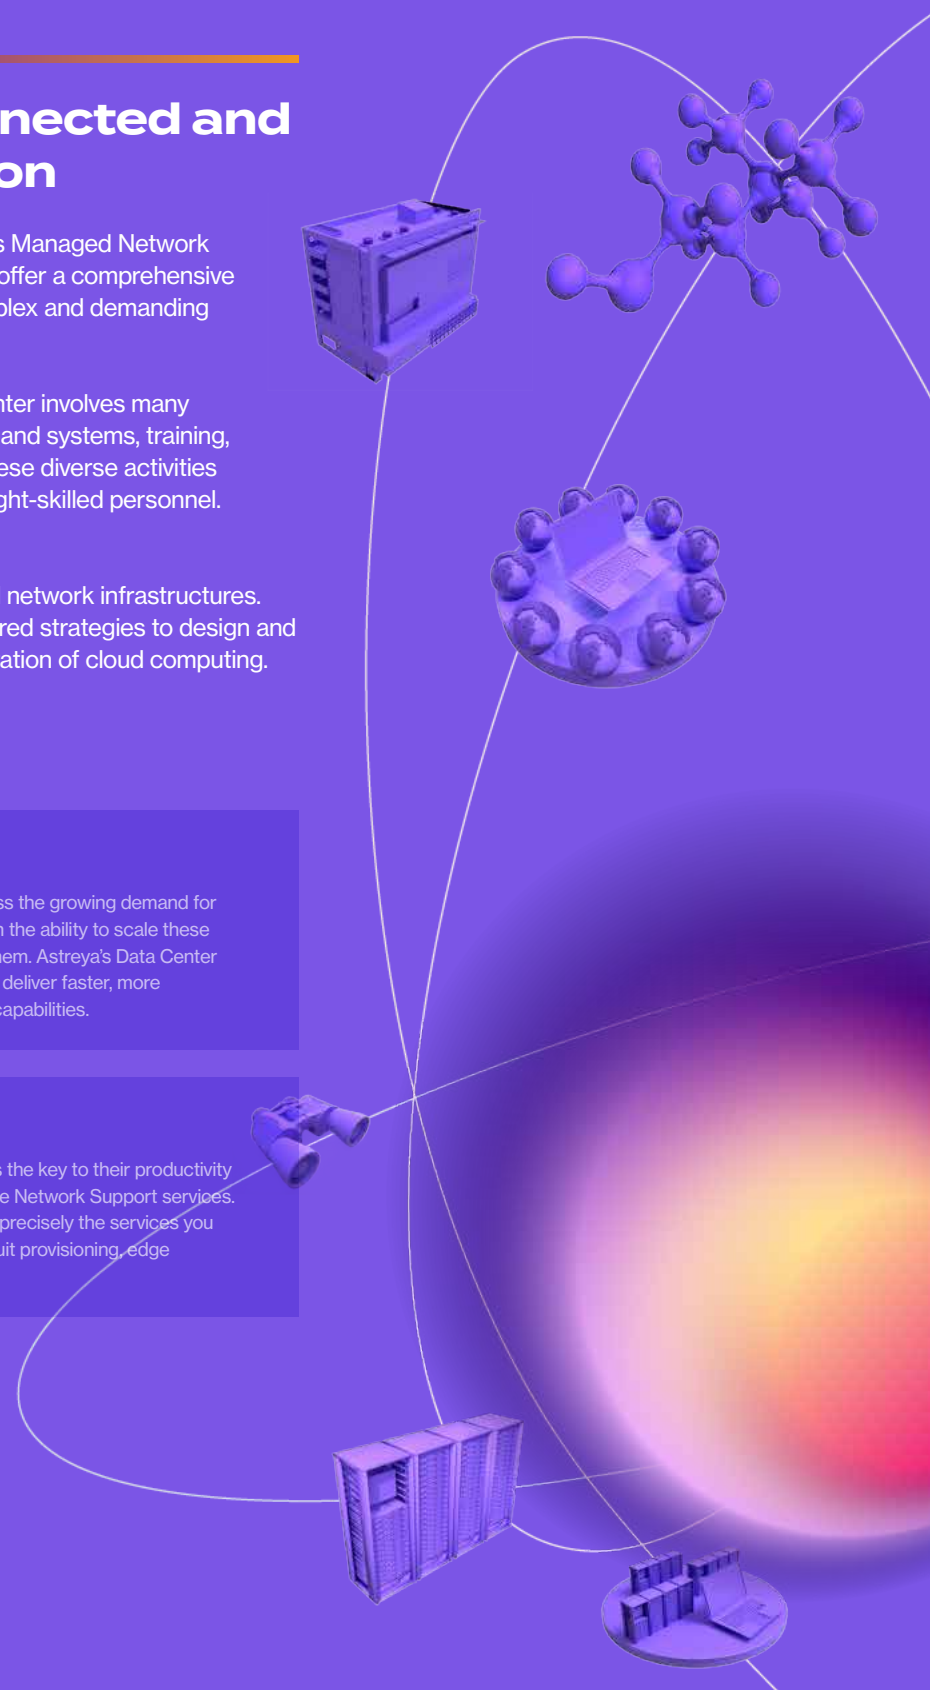

### DATA CENTER

Astreya represents a strategy to address the growing demand for right-skilled Data Center Engineers with the ability to scale these resources when and where you need them. Astreya's Data Center Management solutions are designed to deliver faster, more cost-effective and secure data-center capabilities.

### NETWORK

Keeping your organization connected is the key to their productivity and the sole focus of Astreya's Complete Network Support services. Our flexible options allow you to select precisely the services you need including engineering design, circuit provisioning, edge operations and network operations.

# Astreya is where IT infrastructure reveals itself as a competitive business strategy.

Company IT infrastructure is moving from the closet to sophisticated data centers. This is not an overnight shift, but an evolutionary change in thinking how we deliver services to our customers and to the business.

Data center use has shifted from simple servers to enabling hybrid digital infrastructures. You require new applications to interact with customers, manage supply chains, process transactions, and analyze market trends. Astreya's offers specialized support for evolving data center technology to improve its availability, reduce costs, optimize performance and oversee long-term health.

We're proud to be a part of the modern IT service delivery movement and even prouder of the companies making this journey with us.

## About Astreya

Astreya is a new kind of Managed IT services provider. We offer modern information technology, business, and hyperautomation solutions that help today's growing companies tackle growing IT challenges with relevant, innovative, and cost-effective approaches. Astreya is a privately held, profitable, and growing company headquartered in San Jose, California, in Silicon Valley's heart. We have grown to serve customers in 35 countries. We employ a network of more than 700+ talented IT and support professionals worldwide.
