

# Innovations in Inventory Management Enhance Employee Performance.

## Sophisticated Inventory Management Improves Employee Engagement

### Key Challenges

Employee readiness is dependent upon access to the most up-to-date and reliable devices and accessories at any notice and at any time. An employer's ability to instantly deliver top technology without breaking the bank depends on top inventory control processes. The client needed a solution that would:

- Effectively and economically deliver global IT assets, including accessories, to both new and current employees with low turn-around times and in a cost effective manner
- Maintain control of assets and accessories on which IT budget is spent while preventing added costs from lost or stolen equipment

### Solution

Astreya's superior client collaboration and outstanding leadership is the basis for a complete solution, helping the client to realize more than cost savings:

- **IT Team Productivity Improvement:** By managing the entire asset lifecycle from user request through ordering, preparing and deployment, we free in-house IT teams to focus on more core responsibilities.
- **Global Employee Productivity Improvements:** Astreya monitors inventory and fulfills needs long before stocks are depleted, ensuring employees have access to the devices they need, exactly when they need them.
- **Reduced IT Waste and Improved Asset Control:** We account for 100% of IT assets and accessories weekly to determine location and condition. Then we collect and recycle outdated items, ensuring client has complete insight and control of inventory.

### Results

- 100% control of IT assets, zero waste and faster delivery
- Ready and empowered employees and stricter control of IT assets through Astreya's complete inventory management solution
