

Astreya's combination of technology expertise, supply chain insight, global partnerships, and proven IT Logistics frameworks will advance your company in ways that promote efficiency, enable seamless collaboration, and boost your bottom line.

GLOBAL IT LOGISTICS

“

Astreya has been one of our best IT partners to date. Astreya provides contract flexibility, scalability, and partnership. Astreya employees have a high sense of accountability and are technically astute.”

Senior Client Stakeholder
Fortune-10 Technology Product Company

Let's take a minute to simplify the principles of modern supply chain management.

Supply chain management is a multifaceted discipline that involves coordinating and optimizing the flow of goods, services, and information between different stakeholders in the production, distribution, and maintenance of products and services. It encompasses a wide range of skills and activities, including sourcing, procurement, logistics, transportation, warehousing, inventory management, and quality control. These skills can be grouped into three main categories: Buy it, Make it, Move it.

Buy it

- Strategic Sourcing
- Tactical Procurement
- Vendor Management
- Procure-to-Pay

Make it

- Lean Manufacturing
- Operations Research
- Quality Management
- Industrial Engineering

Move it

- Distribution Network Optimization
- Transportation
- Warehousing

Astreya represents modern, seamless and reliable approach to Global IT Logistics.

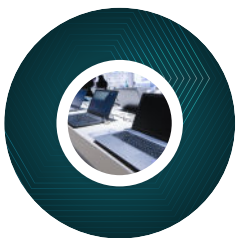

Astreya is an innovative and reliable force in global IT logistics. We provide personalized solutions to keep technology systems running efficiently by helping businesses across the world get the right hardware, software, and services they need at the right time. Our team of highly qualified professionals proactively monitor each step of the delivery process, ensuring that all IT needs are met and exceeded.

We're your one-stop shop for Global IT Logistics success. Our comprehensive services and cutting-edge solutions leverage our supply chain foresight and extensive network of international partners to help you develop a winning strategy ready for any scale.

IT Logistics Assessment Services

Astreya provides IT logistics Assessment and Consulting Services to help organizations optimize their supply chain and improve the efficiency and effectiveness of their IT operations. We help organizations to identify and address inefficiencies in their supply chain, such as bottlenecks, delays, or quality issues. We also help organizations to identify opportunities for cost savings and process improvement, such as by streamlining operations, automating processes, or implementing new technologies.

Optimized Procurement

Astreya provides IT logistics Assessment and Consulting Services to help organizations optimize their supply chain and improve the efficiency and effectiveness of their IT operations. We help organizations to identify and address inefficiencies in their supply chain, such as bottlenecks, delays, or quality issues. We also help organizations to identify opportunities for cost savings and process improvement, such as by streamlining operations, automating processes, or implementing new technologies.

Intelligent Inventory Management

Our comprehensive inventory management system ensures you are provided with the top-tier solutions, tools and processes to keep your business running optimally. Our proactive approach provides strategic oversight of existing as well as inactive IT assets so that compliance standards and tracking capabilities can be met efficiently. This modernized solution will enable full coverage throughout the entire asset lifecycle - giving you peace of mind knowing your inventory strategy is specifically aligned to your goals.

Seamless Deployment Services

Our team unites technology and human expertise to seamlessly deploy IT assets around the globe, curb costs and maximize efficiency. Leveraging years of experience, we ensure your company's resources are never strained during enterprise deployment. This process encompasses governance measures for asset control as well as imaging, tracking equipment, all while providing a superior customer service.

Compliant Reverse Logistics

Astreya provides a comprehensive solution for managing end-of-life assets to maximize returns and minimize risks. Our team efficiently resolves warranty issues, securely reclaims the value of used equipment, engages in reuse opportunities, and recycles according to R2 standards when appropriate. We collaborate with you every step of the way so your reverse logistics processes are compliantly managed from start to finish - ensuring data protection, ROI optimization and responsible recycling/disposal practices - all while keeping costs low.
