

# Astreya Cloud Governance and Security.

Secure and govern your cloud environment effectively.

In today's environment companies are leveraging the cloud - whether its IaaS, PaaS, and/or SaaS - and it's critical to provide compliance and reporting related to the entire cloud infrastructure under operational support and usage in response to investigation of security related incidents.

## What should you do?

Build a cloud security governance model and adopt a governance framework to leverage cloud security and governance best practices.

**71%**

of IT leaders say it's difficult to apply conventional information security principles to the cloud.

**62%**

of IT leaders believe cloud resources are increasing compliance risk.

## Leverage critical objectives with your governance framework

Strategic Alignment

Value Delivery

Risk Mitigation

Effective Use of Resources
