

Innovative RFID Technology Enhancements Improve Employee Readiness

Advanced Technology Saves Time and Improves Inventory Management

Employees needed fast and convenient access to common accessories, but the absence of equipment tracking mechanisms was getting in the way of efficient inventory management.

Astreya's Solution

Astreya's flexible and innovative inventory management solution was the perfect fit. Supplying RFID chips to inventory allowed for the creation of automated restocking processes for accessory racks at Tech Kiosk locations.

- **12% of workday gained back** for 230+ tech support team members

The Results

- \$230,000 per month saved through effective inventory management and workday gains
- Employees are now more productive, thanks to up-to-the-minute access to devices.
