

Enhanced Self Service Reporting for Top Silicon Valley Technology Mover and Shaker

Insight Access for all with Self Service Reporting Process

Astreya recognizes the importance of data and of easy access to the right insights. Buried information or that requiring extensive high-level support to find, leads to costly delays and lack of insight on critical decisions. To help our client, we needed an agile, user-friendly reporting mechanism to overcome three key challenges:

- High volume data transcription
- Duplicate/redundant data pulling
- Excessive excel massaging required after running report

Astreya's Solution

To provide an easy-to-use system capable of pulling the right **insights** at the right time with easy to manage output, we applied our Data/Reporting Analysts to assess data requests and consumption patterns.

Utilizing the insights gained, we leveraged SQL to build a robust, user-friendly process to enhanced composite reports with continual on-demand access.

The Results

- Instant, self-service access to advanced insights and reporting
- Access to the right information at the right time results in better decisions and more efficient usage
